How to use this resource:

These cards are designed to be used with Orton-Gillingham and other phonics activities as well. They are not to be used more than once.

The cards appear in back to back format in 3 versions: one includes black and white images, and the last includes a keyword(s) and sound(s) for that phonogram. I also have a version without the color background if you prefer to print in black and white.

If you'll be printing these in front and back format, please print and test a few pages first. For my printer, I set it to "print on both sides of the paper" and "print on the edge".

In an OG lesson, you would use these by holding up the card with the letter or phonogram, the keyword for it, and the sound. Then you would use the cards with an image and transition to letter only cards.

Thank you for your purchase! If you have any questions, please email at info@thriveedservices.com before leaving a review or leave any feedback.

HAPPY TEACHERS SAID...

“ I used these with my students with learning disabilities and it helped them with learning the sounds and letters. ”

“ These cards are great for my small groups during word work. I laminated them for durability, and it has been a great addition to my toolbox. ”

“ Teaching higher grade students lower grade skills is not always easy...using these cards to teach the skill kept the students from feeling like we were using "baby" materials ”
